

To whom it may concern, satellite radio is an opportunity for all americans as a whole to directly have all our views and opinions heard and not have our voices stifled nor have to conform to the rules that the general media has to abide by.

of course yes the events that unfolded at the super bowl may have put a sour taste in some mouths of certain individuals but it is an election year so there has to be some political voting points but it is a violation of the constitution to prohibit any and all views expressed openly my grandfather didnt die for this country for me to have my open opinion revoked.

keep the airwaves alive and stop trying to run peoples lives!
